COURSEWARE PRODUCTION & TRAINING SKILLS

Courseware Development: Curriculum Design | Course Outlines | Self-Guided Learning Paths | Assessment Tests | Lab Development | Lab Environment Development | Technical Writing | LMS | ADDIE | Bloom's Taxonomy

Training Delivery: Instructor-Led | In-Person | Virtual | Train the Trainer | Webinar | Code Review | Capstone Projects | Zoom | WebEx | Goto Training | Google Meet | MS Teams

Technical Writing: Courseware | Lab Instructions | Assessment Questions | Webinars | Blog Posts, Tutorials | Coding Examples | Demo Applications

Technical Skills Taught: WebApp Development | React | JavaScript | TypeScript | Angular | HTML | CSS | Bootstrap | Server Development | REST APIs | Java | Spring Boot | Node.js | Python | CI/CD | Docker | Kubernetes | HELM | AWS | SQL | NoSQL

Lab Environments & Sandboxes: VMs | Custom | Local | Cloud | Docker | Browser | Jupyter

AI Creation Tools: HeyGen (AI Avatars) | ElevenLabs (Voice Cloning & TTS) | Canva AI | Gamma App | Photoroom | Grammarly

AI Chat (LLM): Claude (Anthropic) | Gemini (Google) | ChatGPT (OpenAI) | Microsoft Copilot

WORK EXPERIENCE

2019 – Present:

Courseware Author, Trainer & Subject Matter Expert

Independent, West Hurley, USA & Hamburg, Germany

Focus: Architecting end-to-end technical training ecosystems—including curriculum design and hands-on labs—to upskill enterprise engineering teams in full-stack and cloud-native development.

- Design, develop, update, and improve technical courseware and instructor-led training materials covering React, Node.js, Java, AWS, and Kubernetes for enterprise engineering teams.
- Choose optimal topics to cover and create learning assessments through skills-gap analysis.
- Build production-grade full-stack reference applications and cloud-based lab environments to simulate real-world development scenarios for learners.
- Design and implement validation and standardization practices for lab environments and materials.
- Deliver live online training sessions, webinars, and technical workshops to maintain repeat engagements with enterprise clients.
- Research, validate, and integrate modern technologies and AI-assisted development workflows into courseware to keep training content aligned with industry practices.

2016 – 2018:

Technical Stream Lead, Developer, Consultant & Trainer

Web Age Solutions, Toronto, Canada

Focus: Developing and managing enterprise training programs - including technical curriculum and lab infrastructure - for a major IT training provider, enabling technical upskilling of Fortune 500 software development teams.

- Led the technical courseware stream, ensuring content quality, technical accuracy, and alignment with real-world engineering practices.
- Authored and maintained extensive training manuals (200–400 pages per course) covering React, Angular, Node.js, Java, AWS, Docker, and Kubernetes.
- Designed and implemented full-stack training applications and lab environments to support hands-on learning across multiple technologies.
- Improved lab reliability and deployment consistency by adopting containerized VMs & Docker-based environments, reducing setup-related issues.
- Delivered on-site and virtual technical training sessions for enterprise clients.

2010 – 2015:

IT Trainer

Independent, West Hurley, USA

Focus: Delivering high-impact technical instruction and hands-on lab support to enterprise engineering teams, enabling them to deliver next-generation software development solutions.

- Developed and validated step-by-step technical labs to ensure consistent execution across training environments.
- Reduced lab failure rates from common execution issues by ~30% through systematic validation and pre-run testing.
- Created video-based training content to scale delivery and reduce dependency on in-person sessions.

2000 – 2009

Independent Consultant, Technical Trainer & Product SME

- Senior Mobile Software Engineer | Vetro Corp (NYC) | 2006 – 2008
- Product Application Engineer | Solidtech (CA) | 2006 – 2007
- Independent Consultant | Self-Employed | 2002 – 2004
- Technical Product Consultant | PointBase | 2000 – 2002

ACHIEVEMENTS

Delivered 200+ live technical training engagements to ~100 enterprise clients, reaching an estimated 2,000–3,000 developers (sustained avg. 4.5/5 student rating)

EDUCATION - Bachelor of Science in Physics, Stony Brook University, Stony Brook, NY, USA

LANGUAGE SKILLS - English (Native / Mother tongue) | German (A1)

OUTSIDE INTERESTS - Songwriting | Hosting Parties | Mystery Novels | Language Studies
